
Ground truth vs. K-means vs. NJW spectral clustering
(predicted cluster ids re-mapped to ground-truth colours for display only)
Concentric circles: ground truth
K-means on raw coords (ARI = -0.002)
NJW, sigma = 0.105 (ARI = 1.000)
Two moons: ground truth
K-means on raw coords (ARI = 0.274)
NJW, sigma = 0.0838 (ARI = 1.000)
Isotropic Gaussian blobs: ground truth
K-means on raw coords (ARI = 1.000)
NJW, sigma = 0.44 (ARI = 1.000)
