Three concentric rings (our data): effect of asking for k=2 vs k=3
(predicted colours re-mapped to ground-truth palette for display only; not the paper's threecircles-joined dataset)
Ground truth (3 rings)
cluster 0
cluster 1
cluster 2
K-means k=2
ARI vs 3-ring truth = -0.003
NJW k=2, sigma = 0.0936
inner vs middle+outer
ARI vs 3-ring truth = 0.570
NJW k=3, sigma = 0.0936
ARI vs 3-ring truth = 0.522
